Product Description

BQ-1006-Supine Shoulder Lift Trainer, Shoulder Training, Shoulder Lift Training, Push Training, Supine Push Training

The supine shoulder lift trainer is a high-end product at the commercial gym level. The product adopts industrial powder spraying technology, with a round and full paint surface, beautiful and generous appearance, and good rust prevention ability. The product is developed in collaboration with professional fitness coaches and equipment design engineers. The product's activity trajectory is stable, and the exercise trajectory is tested and qualified by professional fitness coaches, which can meet the needs of multiple people, including professionals and sub professionals. The product seat cushion is designed according to ergonomic principles, making it more comfortable. The product frame is welded with high-precision steel pipes, which is sturdy and stable. The seat is designed with multiple adjustable gears, and the sliding bar is treated with chrome plating technology, making it adjustable and flexible.
