### **Product Description**

### Pilates elevated core bed, maple core bed, multi-functional three in one, multi-functional yoga flat bed

Pilates maple core bed is a device used for Pilates training, made of maple wood, with the following characteristics and benefits:

Features: Stability: Maple wood is sturdy and durable, providing stable support to ensure the safety of users during training. Multifunctional: It can train various Pilates movements, such as sit ups, leg stretches, back stretches, etc. Adjustable: The components of the Pilates maple core bed can be adjusted to accommodate users of different heights and training needs. Aesthetics: The natural texture and color of maple give it a high level of aesthetics, adding an elegant touch to the fitness environment.
