Product Description

Household pull-up, horizontal bar, indoor horizontal bar, non perforated door horizontal bar, door frame horizontal bar

The perforated door frame horizontal bar is a fitness equipment installed on the door frame, usually used for pull-up training. The following are some features and usage suggestions about the non perforated door frame horizontal bar:

characteristic:

Non drilling installation: No need to drill holes on the door frame, which will not cause damage to the door frame;

Adjustable: Generally, it can be adjusted according to the width of the door frame to adapt to different installation environments;

Lightweight and portable: Most non perforated door frames have smaller and lighter horizontal bars, making them easy to carry and store;

Multifunctional: In addition to pulling up, it can also perform other simple fitness movements, such as hanging, stretching, etc.
