Product Description

Rubber coated hexagonal pure steel dumbbells, gym cast iron rubber coated dumbbells, hexagonal rubber coated dumbbells

Hexagonal adhesive dumbbells are a common fitness equipment with the following characteristics:

Unique design: The hexagonal design makes it more stable when placed, less prone to rolling, and reduces safety hazards.

Excellent material: usually wrapped with cast iron or pure steel inner core and outer rubber material, sturdy and durable, while rubber material can also provide a certain degree of anti slip and grip comfort.

Widely applicable: can be used for various strength training, such as bending, push, squat, etc., suitable for people with different training needs.

Diverse weight options: There are multiple weight specifications to choose from to meet the needs of different exercise stages and individual strength levels.

When choosing hexagonal adhesive dumbbells, you can consider the following factors:

Weight: Choose the appropriate weight based on your strength and training goals.

Brand and quality: Choose well-known brands and products with reliable quality.

Handle design: The design of the handle should conform to ergonomics, with a comfortable grip and not easy to slip.

Price: Choose a suitable product based on your budget.

When using hexagonal adhesive dumbbells, pay attention to the following points:

Follow the correct training methods and posture to avoid injury.

Gradually increase training intensity and weight to avoid overtraining.

After use, it should be stored properly to prevent dumbbells from being hit or squeezed.
