Product Description

Sports stepper, load mini stepper, hydraulic fitness stepper with LCD display

Brand: Customizable logo

Color: White, Red, Pink

Function: Stepper+Fitness Bench

Net weight of product: 7kg

Load capacity: 150kg

Regarding this project

Promote fat burning: The stepper accelerates fat burning in the buttocks and legs through continuous walking; Continuous high-intensity aerobic exercise can quickly reduce lower limb fat, enhance muscle strength, and achieve the goal of lifting buttocks and slimming legs.

Ultra quiet operation: There is a silent silicone cushion under the stepper, which provides cushioning when you walk. The sound of movement is only 25 decibels, so you don't have to worry about waking up your sleeping child at home.

High resistance aerobic exercise: The stable hydraulic system of the stepper will maintain high resistance for 30 minutes during each exercise cycle, helping you burn fat quickly; After 30 minutes, the resistance will gradually decrease, helping you maintain an aerobic exercise state and achieve optimal exercise results anytime, anywhere.

Ready to use out of the box; Moving to any room is easy; Whether it's watching TV while taking steps or doing leg training at a standing desk, it's a pleasant workout.

Space saving and easy storage: The size of the stepper is 16 * 12 * 14IN, requiring only 1.29FT² of floor space; The compact size is suitable for any limited space, so you can start walking anywhere and store it in any narrow corner.

300 pound loading capacity: The loading structure of the stepper is made of 1.5mm thick commercial steel, ensuring absolute stability and a 300 pound load capacity.

Strengthen balance and core muscles: There is a stride adjustment knob at the bottom of the stepper; You can adjust the height of the steps as needed to maintain balance and strengthen the core muscles;

Our Product Introduction

Low stride makes it easier for you to walk and extend exercise time, while high stride burns more calories. Tracking exercise data: The intelligent LCD digital display can help you track COUNT, time, CAL, SCAN, and REPS/MIN data, allowing you to know your exercise results at any time. Full body exercise: The Niceday Stepper includes two high elastic resistance bands; You can engage in upper body exercises while walking to achieve the goal of burning fat and sculpting your entire body.
