Product Description

The 1500 pound multifunctional trailer was designed by agricultural experts. Although other manufacturers have replicated this design, the trailer is not the same.

Solid steel flooring: Unlike trailers that use rubber pads on mesh flooring, this impact tool features a solid steel flooring. Once the rubber pad tears or tears, soil, gravel, coverings, and other items will fall off the net floor of the trailer, and you can expect years of use.

Heavy duty trailer: The multifunctional vehicle trailer has a load capacity of 1500 pounds and a towing capacity of 15 cubic feet, capable of handling anything you throw at it. The 18 inch x 8-inch 4-layer pneumatic tires provide excellent traction and stability, while the 1-inch axle provides you with an 11 inch ground clearance. Whether you are sailing in muddy, snowy, or rugged terrain, these tires will help you complete your work.

Easy to use: The foot pedal, quick release buckle, and tilted trailer bed make loading and unloading effortless. Thanks to the user-friendly design of this UTV trailer, you don't have to struggle with heavy loads or awkward angles.
